

## **25kW<sup>1</sup> Standby Generator Overview Copy:**

This Briggs & Stratton® standby generator provides your entire home with enough power to run heat or air conditioning units, while allowing you to turn on lights and your appliances. New to the Briggs & Stratton standby power lineup, the 25kW<sup>1</sup> gives homeowners more options than ever for backup power.

### **Features & Benefits:**

- Thanks to Symphony® II Power Management System, a smaller home generator system by Briggs & Stratton can meet all your needs and save you money in the process.
- This 25kW<sup>1</sup> with Symphony® II Power Management can manage a home, up to 19,000 square feet with a 5-ton air conditioner saving you thousands less than a previously required larger, liquid cooled unit
- Comprehensive 5-year parts and labor limited warranty<sup>2</sup>
- Worry-free Monitoring with the Basic Wireless Monitor or the Infohub™ Wireless Monitor
- Automatically turns on for your home in seconds after sensing a power outage
- Sleek and Durable Enclosure that is specifically designed to fit through a standard 36" gate eliminating the need for a crane at install
- Simple panel removal which is easier to service

## **25kW<sup>1</sup> w/ 200 Amp Overview Copy:**

This Briggs & Stratton® home generator provides reliable backup power for homeowners during a power outage. This generator makes sure your appliances stay on so you and your family aren't left in the dark. The width of this unit was specially designed so it can fit through a standard 36" gate, eliminating the need for a crane at installation. Includes outdoor/indoor NEMA 3r rated automatic power transfer switch, providing flexible installation.

### **Features & Benefits:**

- Thanks to Symphony® II Power Management System, a smaller home generator system by Briggs & Stratton can meet all your needs and save you money in the process.
- This 25kW<sup>1</sup> with Symphony® II Power Management can manage a home, up to 19,000 square feet with a 5-ton air conditioner saving you thousands less than a previously required larger, liquid cooled unit
